Data Science Analyst – Test

Dear Candidate,

Greetings from <u>ProjectPro</u>! Here is a chance for you to be a part of a growing organization. At ProjectPro, we believe in changing the world for developers by providing them with reusable end-to-end project solutions. Let us know how well and uniquely you fit the role you are applying for. Please see below for the use case and solve it.

Dataset:

We are providing a dataset containing information of 2000 customers over 16 variables.

Aim:

To predict whether the customer will churn or not

Task:

- 1. Exploratory Data Analysis
- 2. Data Preprocessing
- 3. Model Building
- 4. Evaluation
- 5. Results

Note: You are free to add any task if you wish.

Submission files:

- 1. ipvnb notebook
- 2. Modularised code
- 3. Solution Methodology

The structure for modular code should be as follows:

Input: contains all the input data

Output: output files

ML Pipeline: containing all the reusable code for the problem in functional form

Engine.py: This is the main file that needs to be called to run the entire code in one

go

Requirements.txt: the file containing all the required libraries

Readme.md: instructions to use the code

Solution Methodology: The file must contain information of Dataset, Aim, Approach, Results, Takeaways of the problem solved.

Here are some points to remember

- 1. Your code should run irrespective of the machine used
- 2. Make crisp and precise documentation of the results or any observation for the problem
- 3. More importance will be given to the approach followed
- 4. You should have a deep understanding of whichever things(models, algorithms) you are using in your solution

The files must be submitted in a single zipped folder to supriya@projectpro.io. The name of the zipped file must be the applicant's name followed by '_data_science_test_projectpro'.

The solution will be accepted on or before Nov 28, 2021 10 A.M. Any late submissions won't be accepted.

If you have any doubts, drop a mail at supriya@projectpro.io
